Volume 87 (1992)

PHYSIOLOGY AND BIOCHEMISTRY

Evidence for and properties of a tripeptidyl peptidase in soybean (*Glycine max* Merr.) extract
by I. Shimotsuura, N. Yoshida, F. Ogata and A. Ito (Fukuoka, Japan) 1–7

Seed storage proteins from *Pinus pinaster* Ait.: homology of major components with 11S proteins from angiosperms
by I. Allona, R. Casado and C. Aragoncillo (Madrid, Spain) 9–18

Development and line dependent variations of *Petunia* plasma membrane H^+-ATPase sensitivity to auxin
J.-M. François, A. Bervillé and M. Rossignol (Dijon, France) 19–27

Plasma membrane preparations from suspension cultured plant cells contain the enzymes for the recycling of phosphatidic acid and diacylglycerol
by J.B. Wissing, L. Grabowski, E. Drewitz, A. Hanenberg, C. Wylegalla and K.G. Wagner (Braunschweig, FRG) 29–37

The effect of calcium and calmodulin inhibitors on NADH oxidation by isolated plasma membrane vesicles preloaded with NADH
by M. Böttger, R. Barr, O. Döring, F.L. Crane, A. Brightman and D.J. Morré (Hamburg, Germany; Lafayette, IN) 39–44

GENETICS AND MOLECULAR BIOLOGY

Transgenic potato plants depleted for the major tuber protein patatin via expression of antisense RNA
by R. Höfgen and L. Willmitzer (Berlin, Germany) 45–54

Expression of active hen egg white lysozyme in transgenic tobacco
by J. Trudel, C. Potvin and A. Asselin (Québec, Canada) 55–67

CELL AND TISSUE STUDIES IN VITRO

Glutamine enhances storage protein synthesis in *Medicago sativa* L. somatic embryos
by F.-m. Lai, T. Senaratna and B.D. McKersie (Ontario, Canada) 69–77

Callus development and plant regeneration from different explants of six wild species of sunflower (*Helianthus* L.)
by M.S. Punia and N.E. Bohorova (Hisar, India; Sofia, Bulgaria) 79–83

A freeze fracture analysis of the surface of embryogenic and non-embryogenic suspension cells of *Daucus carota*
by A.M.C. Emons, J.W. Vos and H. Kieft (Wageningen, The Netherlands) 85–97

A scanning electron microscopy and X-ray microanalysis study during induction of morphogenesis in *Camellia japonica* L.
by M.C. Pedroso and M. Salomé Pais (Lisbon, Portugal) 99–108

Artificial seed production in the male bamboo *Dendrocalamus strictus* L.
by S. Mukunthakumar and J. Mathur (Gorakhpur, India) 109–113

GENERAL

Detection, expression and specific elimination of endogenous β-glucuronidase activity in transgenic and non-transgenic plants
by L. Hodal, A. Bochardt, J.E. Nielsen, O. Mattsson and F.T. Okkels (Copenhagen, Denmark) .. 115–122

PHYSIOLOGY AND BIOCHEMISTRY

Effects of gabaculine on 5-aminolevulinic acid dehydratase during development of bean chloroplasts
by M.M. Darweesh (Columbus, OH) 123–132

Relationship of nitrate and tonoplast ATPase activity in vacuoles and tonoplast vesicles from lettuce
by M. Blom-Zandstra, J. van Hattum and H.T.M. Koot (Wageningen, The Netherlands) 133–141
Appearance of new lipoxygenase isozymes during seedling germination of *Vicia sativa*
by R.H. Andrianarison and J.L. Beneytout (Limoges, France) 143–150
Synthesis of nitrite reductase is regulated differently in leaf and root of barley (*Hordeum vulgare* L.)
by E. Duncanson, S.-M. Ip, A. Sherman, D.W. Kirk and J.L. Wray (St. Andrews, UK) 151–160

GENETICS AND MOLECULAR BIOLOGY

Regeneration of transgenic kale (*Brassica oleracea* var. *acephala*), rape (*B. napus*) and turnip (*B. campestris* var. *rapifera*) plants via *Agrobacterium rhizogenes* mediated transformation
by M.C. Christey and B.K. Sinclair (Christchurch, New Zealand) 161–169
Effect of promoter-leader sequences on transient reporter gene expression in particle bombarded pea (*Pisum sativum* L.) tissues
by T.D. Warkentin, M.C. Jordan and S.L.A. Hobbs (Saskatoon, Canada) 171–177

CELL AND TISSUE STUDIES IN VITRO

Agrobacterium-mediated genetic transformation of *Solanum commersonii* Dun
by T. Cardi, V. Iannamico, F. D'Ambrosio, E. Filippone and P.F. Lurquin (Portici, Italy) 179–189
Plant regeneration from cell suspension and mesophyll protoplasts of *Helianthus maximiliani* (Schrad.)
by Z. Polgár and S. Krasnyanski (Szeged, Hungary) 191–197
Cryopreservation of alginate-coated in vitro-grown shoot tips of apple, pear and mulberry
by T. Niino and A. Sakai (Sapporo, Japan) 199–206
The role of sucrose, auxin and explant source on in vitro rooting of seedling explants of *Eucalyptus sideroxylon*
by B. Cheng, C.M. Peterson and R.J. Mitchell (Auburn, AL) 207–214
Somatic embryogenesis and plant regeneration from immature embryo culture of *Pharbitis nil*
by S.-R. Jia and N.-H. Chua (Singapore, Hong Kong and New York, NY) 215–223

GENERAL

Ureides and enzymes of ureide synthesis in wheat seeds and leaves and effect of allopurinol on *Puccinia recondita* f. sp. *tritici* infection
by P. Montalbini (Perugia, Italy) 225–231
